### **NOTE TO PURCHASERS**

The Welsh Mule Sheep Breeders' Association extends a warm welcome to buyers at its Thirty Eighth official sale at Welshpool.

The Entry of Sheep catalogued have been bred on the traditionally hard and healthy hill farms of Wales.

The Society members are obliged to use Rams officially approved by the Blue-Faced Leicester Society as sires for the Welsh Mules on offer, and the sheep have to be bred from either the hardy Welsh Mountain, Speckled Face, or Beulah ewes, all hill breeds renowned for their hardiness and exceptional mothering qualities.

Despite the fact that the Welsh Mule Society was only officially formulated in 1976 - the breed is already firmly established throughout England and Wales (and in Scotland) as one of the most popular breeds for crossing with recognised fat lamb sires for the production of Prime quality lean fleshed lambs as now demanded by both the British housewife and continental markets.

The sheep are acclaimed as excellent mothers giving minimal lambing problems, good milkers, yield wool of a high grade and are of a temperament to adapt to either intensive outdoor or indoor wintering systems. Other commercial characteristics of the breed being their ability to produce early maturing Prime lambs, and longevity resulting in low depreciation rates for buyers.

Breeding Stock and their lambs have been exhibited at the major National Shows and National Sheep Association events in 2020 and a wide spectrum of Prime Lamb producers were most favourably impressed with the quality of the sheep and of their potential in fulfilling the present day requirements of the meat trade.

Buyers can be assured that there will be adequate transport available for the prompt despatch of sheep purchased to any part of the U.K.

It is the intention of the Association to ensure complete satisfaction, all sheep on offer will be approved by an officially appointed panel of inspectors prior to being offered. for sale. The Society's field officer, Mr W Jones, will be present at the sale and services will be available to all intending and actual purchasers both during and after the sale day.

## Performance Welsh Mules

The Welsh Mule Sheep Breeders Association has provided the sheep industry with high performing, profitable breeding ewes that have benefitted from the maximum amount of hybrid vigour for many years. The benefits of hybrid vigour are at their highest when two breeds are used and that vigour decreases as more breeds are added to the mix. The crossing of the Blue-Faced Leicester with Welsh Mountain and hill breeds has been a proven method of maximising the benefits of hybrid vigour.

A group of Welsh Mule breeders have asked to take the process a little further by supplying Welsh Mule ewe lambs for sale at the association's sales that have been produced by using a 'Performance' recorded Blue-Faced Leicester ram; those ewe lambs are being called simply 'Performance' Welsh Mules.

In order to qualify to market their sheep as 'Performance' Welsh Mules, breeders will have to meet a few simple qualifying criteria.

'Performance' Welsh Mule breeders will need to work with the Blue-Faced Leicester Association and the Welsh Mule Sheep Breeders Association to formally identify 'Performance' Welsh Mules sired that perform above-average on the index of recorded Blue-Faced Leicester Rams.

All 'Performance' Welsh Mules in any one pen must be sired by a Blue-Faced Leicester Ram with an index in the top 50% in the year of purchases, according to Signet 'Performance' recorded data. This data is also available on the BASCO website.

Each 'Performance' Welsh Mule breeder can contact the Blue-Faced Leicester Sheep Association for a certificate which highlights the identify of the qualifying ram or rams used. These certificates can be displayed on the pens at the Welsh Mule sales.

All 'Performance' Welsh Mules will be identified in the sale catalogue with the letters PM shown in bold, immediately after the lot number e.g. if lot 371 is a pen of 'Performance' Welsh Mules then it will appear as 371**PM** in the catalogue.

In 2013, Blue Faced Leicester Rams with an index above 97 were marked as Qualifying Rams for the purpose of producing 'performance' Welsh Mules and this status remains with the ram for it's lifetime. In 2014 the index stood at 111 or above.

The Welsh Mule Sheep Breeders Association and Blue-Faced Leicester Association will continue to work together as this initiative develops.
